

Sudbury Aerial Lift Training

Sudbury Aerial Lift Training - An aerial work platform is a mechanized access platform. This device provides access to otherwise inaccessible places for equipment or people. Also known as an aerial device or elevating work platform, the machinery is often used to be able to access high areas. Maintenance and construction staff normally have to make use of aerial work platforms on the job. Firefighters make use of them for emergency access.

The aerial work platform is intended to temporary application, providing access to high places. They are designed to be operated by one person, with the capability of lifting weights of less than one ton. Several types have higher load limits. There are various types of aerial work platforms; like for example, there is a "cherry picker" and a "scissor lift".

Some aerial work platforms come equipped with compressed air connectors for power tools or electrical outlets. For specialist tasks, such as lifting frames for window glass, an aerial work platform could come along with special tools.

Those who want to operate an aerial lift device must go through training. Usually, the members of a Health & Safety Committee and their representatives are responsible for the inspection of every equipment and work areas and are likewise required to undergo training. Trainees will become familiar with aerial lifting device operation. They will also learn the regulations which apply to safely using these machines. Regulations vary from province to province, and in worksites that are federally regulated.

Any worker who is required to be lifted by or work near an aerial lifting machinery has to be told concerning possible dangers. In a general safety session, an Aerial Lift Training Video could be shown to educate all of the staff who work near them or are lifted by them.

The majority of Aerial Lift Training Program would comprise modules which are focused on the following areas: Aerial Lift Devices and Operating Controls; Hazard Identification; Platform Positioning & Park Positioning and Pre Operational Checks for Aerial Lift Devices. The program is intended to train staff on the safe operation of self-propelled, elevated work platforms and boom supported, self-propelled, elevated work platforms. Employees who finish the program would be given a certificate, signed by somebody qualified to be able to confirm successfully completing a hands-on practical evaluation.
