

Sudbury Boom Lift Training

Sudbury Boom Lift Training - Elevated work platforms, also referred to as aerial platforms, allow workers to perform tasks at heights that will otherwise be inaccessible. There are various styles of lifts meant for various site applications and conditions. If operated carelessly, elevated work platforms can cause serious injury or death. The most common causes of related accidents are electrocution, falls, crushed body parts and tip-overs. Lift operators should be trained fully in procedures in order to avoid accidents during the operation of lifts.

Aerial Lift Safety program is designed for individuals who have to operate the devices more effectively and safely. The program provides thorough instruction on the most utilized lifting devices within the industry.. Types of lift covered include scissor, articulating and boom supported aerial lifts. The video presents the correct procedures operators must follow. Instruction focuses on protection against falls, pre-operational check, safe driving procedure and stability of the device.

The boom lift training program would help to deal with equipment reliability and employee safety, making use of materials which are completely compliant with your local and regional regulations and requirements. Training methods and course management would be taught. The trainer would likewise know the technical aspects of aerial lift safety.

Parts of the Boom Lift Training course consist of both classroom training and practical training. Both sessions should be finished successfully for the participant to be given a certificate of achievement.

The difference between self-propelled elevating work platforms and self-propelled boom-supported elevating work platforms is that, on the latter type, work platforms could be positioned entirely beyond the base of the machine. The theoretical training part is practically the same for both types. The practical training component can be finished more quickly if just one type of machinery is utilized.

Elevating Work Platform Training Program Objectives:

For the safe operation of Boom-Type Elevating Work Platforms and Self-Propelled Elevating Work Platforms, boom lift training will help operators utilize their machines more effectively and would lessen the chances of accidents in the workplace. Trainees will review of company policies and applicable regulations, talk about Due Diligence, study Criminal Negligence and consequences to employers, trainers, workers and supervisors. Participants will review equipment features, stability, operating procedures, parking and fueling/charging procedures. Site-specific safety matters will be addressed.
