

Sudbury Counterbalance Forklift License

Sudbury Counterbalance Forklift License - When operated by completely trained operators, forklifts can become a major asset for firms and companies. We can offer your employees a comprehensive training program that includes all aspects of operating a powered lift equipment. Counterbalance forklift training offers forklift operators with the understanding and practical skills considered necessary in order to efficiently and safely operate forklifts. The program provides a combination of classroom theory, hands-on training and participant observation within a warehouse-type setting. Training can be on site and/or customized.

The course consists of the fundamentals of powered lift trucks, like for instance rules and regulations, parts, load centres and factors affecting stability. General operating procedures are taught, like for instance startup, circle check, shutdown, forward/reverse on level ground, and operating around other individuals. Load handling subject matters comprise load pickup and placement, selection of loads, load security and integrity, loading and off-loading trailers. Participants will learn operational maintenance procedures, like for instance recharging and refueling. Workplace safety concerns will be discussed. People participating will know the environmental conditions affecting lift truck performance and be able to recognize possible dangers. Advanced training on propane handling can be included.

Employees and their employers might face penalties if they do not operate based on national and industry standards. Employees operating a counterbalance forklift must be knowledgeable about the safe operation guidelines of their forklift. Training is recommended for any person applying for a job which requires forklift operation.

We provide hands-on training and in-class theory in small, personalized classes. Training options comprise entry level or refresher courses.

Entry-level Course Outline:

This course is for anybody entering the work force as a forklift operator. Students who are successful should complete the program and pass a series of written and practical exams. Topics comprises: general operating procedures; essentials of powered lift trucks; load handling; operational maintenance; workplace safety; basic regulations and rules.
